

IOT@ Tech-Crafters

Laboratory for creative minds

Vision

To be a globally recognized center of excellence in the field of IoT and establish connection between the physical and the virtual world , that persistently brings new ecologies at all levels for providing quality education, interdisciplinary research and innovative development of smart systems.

Mission

1. To mould the fresh minds into highly competent IoT application developers by enhancing their knowledge and skills in diverse hardware and software design aspects for covering technologies.
2. To create environment in which things become intellectual, smart and behave alive.
3. Interdisciplinary research and education to nurture future experts in IoT research.
4. To promote collaboration with the reputed industries to have the best careers.

Core values

1. We believe in excellence and learning together for the professional careers with specialization in IoT.
2. Through innovation people make their lives easier and it helps them to solve issues associated with increasingly connecting complications.
3. Respect and value each other regardless of his or her position.
4. We believe in nurturing a close connection and developing team camaraderie to promote open communications and concern for each other.
